

# Family Life Center

## Visitation Limitations During COVID-19

*For the health and safety of moms, babies, and staff:*

- Patients are welcome to have one support person with them. The support person will be permitted once the patient is admitted to Labor & Delivery.
- The support person may remain with the patient during the entire time of hospitalization and should plan on staying the duration.
- To help prevent the spread of illness, the support person may not exit and re-enter the Family Life Center.
- The support person may stay overnight.
- A hospital mask will be provided to the support person. We ask that no masks from home be brought in.
- The hospital will provide boxed sandwiches and/or guest trays for the support person.
- If the patient is COVID-19 positive, please understand that the health, safety, and welfare of the mom, baby, support person and others will be considered before determining whether a support person is permitted to stay with the patient.

*Thank you for your cooperation.*
